Executive Summary

- **Project and public purpose**
  
  The project aims to develop an area of land for public and social purposes. The area covered is 0.0057 hectares. The project is located between 352/3 and 352/8, covering an area of 0.0057 hectares. The project is planned to be completed by 01.01.2021. The project is funded by the government. The project area is located in the 352/8 and 352/3 blocks. The project area is suitable for public and social purposes. The project area is located near the road and the railway. The project area is suitable for social and cultural activities.

- **Location**
  
  The project area is located in the 352/3 and 352/8 blocks. The project area is located near the road and the railway. The project area is suitable for social and cultural activities.
• **Size and attributes of Land acquisition**

The size of the land acquisition is 766 square meters. The location is at 352/3, 352/8, with dimensions 34.8 square meters and 46.2 square meters.

• **Alternatives considered**

Various alternatives were considered, including alternative locations for the project. The best alternative was selected based on the criteria set for the project.

• **Social impacts**

The social impacts of the project were significant, affecting the local community. The project was implemented in 2013, and the affected area was 9 square meters. The social impact assessment was conducted in collaboration with the relevant authorities.
ഇസ്ഥാനത്ത് അനുയോജ്യമായ ഏതാണ്ട് കാരണം ഗിരിവിരുത്ത് തുറന്നു. മൂന്നു കാർഷികസമയം പ്രവൃത്തി കരയുക. തുറന്നു ഗിരിവിരുത്ത് സമയത്ത്, വലിയ നിരാന്തരോപന്യാമ്യ പ്രവൃത്തി അടക്കം നല്ല രീതിയിലുള്ള തങ്ങളുടെ സംസ്ഥാനത്ത് എത്തിയാമ്യ. വരുള്ളിരുത്തൽ മൂലി കാരണം അൽ‌ബെറ്റിയോ സംസ്ഥാനത്ത് നയമാക്കാൻ പ്രസ്തുത. വരുള്ളിരുത്തൽ മൂലി അവതരിപ്പിക്കുന്നതു സമകാലീനം കുട്ടികളുടെ നയം അടക്കം പ്രസ്തുതവും.
Detailed project description

Background of the project, including developer's background and governance/management structure

Rationale for project including how the project fits the public purpose criteria listed in the act
Details of project size, location, capacity, output, production targets, costs, risks

- Examination of alternatives

4.3

**Description and rationale for the methodology and tools used to collect information for the social impact assessment**

- **Participatory observation**, **Rural appraisal**, **Informal interview** with key informants. The selected methodologies are used to gather data from the field. The study area is located in the 1302.2023 to 1302.2023 period. The sampling frame includes households, local communities, and government officials. The study period is from 13.02.2023 to 13.02.2023. The methodology is based on field observations and interviews conducted by sociologists and local development officers.
Sampling methodology used

The methodology used was Stakeholder Analysis, Participatory Rural Appraisal, and Beneficiary Assessment.

Overview of information/data sources used

The information sources used included facts, data, and observations. These were collected through field visits, interviews, and discussions with key stakeholders.

Schedule of consultations with key stakeholders and brief description of public hearings conducted

Consultations were held with key stakeholders and included brief descriptions of public hearings conducted.
Land assessment

Describe with the help of maps information from land inventory and primary sources.

Entire area of impacts under the influence of the project. (not limited to land area for acquisition)

Total land required for the project

Land (if any) already purchased alienated, leased or acquired, and the intended use for each plot of land required for the project

Quantity and location of the land proposed to be acquired for the project

Nature, present use and classification of land and if agricultural land, irrigation
Size of holding, ownership patterns, land distribution and number of residential houses
Land prices and recent changes in ownership, transfer and use of lands over the last 3 years

Estimation and enumeration (where required) of affected families and assets

Estimation of families

Families which are directly affected (own land that is proposed to be acquired)

Family of scheduled tribes and other traditional forest dwellers who have lost any of their forest rights.
Families which depend on common property resources which will be affected due to acquisition of land for their livelihood

Families which have been assigned land by the state government or the central government under any of its schemes and such land is under acquisition

Families which have been residing on any land in the urban areas for preceding 3 years or more prior to the acquisition of the land

Families which are indirectly impacted by the project (not affected directly by the acquisition of own land)

1. '36 years' age and above
g. The project area

d. Inventory of productive assets and significant lands

Socio-economic and cultural profile (affected area and resettlement site)

Demographic details of the population in the project area
Income and poverty levels
The local livelihoods are threatened by the periurban扩张 of the city. The local economy is based on agriculture, hunting, and fishing. The local population depends on these activities for their livelihood. However, the expansion of the city has led to the loss of land for agriculture and fishing. The local economy is also affected by the high cost of living in the city. The local population is struggling to make ends meet.

Vulnerable groups
The local livelihoods are threatened by the periurban expansion of the city. The local population depends on agriculture, hunting, and fishing. The local economy is based on these activities. However, the expansion of the city has led to the loss of land for agriculture and fishing. The local economy is also affected by the high cost of living in the city. The local population is struggling to make ends meet.

Social Impact Management Plan

Approach to mitigation

Measures to avoid, mitigate and compensate impact
Measures that are included in the terms of rehabilitation and resettlement and compensation as outlined in the act
Measures that the requiring body has stated it will introduce in the project proposal

The requiring body has stated it will introduce measures in the project proposal to address the extent and intensity of impacts across various groups as identified during the social impact assessment process. These measures include alterations to project design and additional measures that may be required to address the extent and intensity of impacts across various groups. The detailed mitigation plan includes specific measures to mitigate the impacts.

Detailed mitigation plan

The requiring body has stated it will introduce measures in the project proposal to address the extent and intensity of impacts across various groups as identified during the social impact assessment process. These measures include alterations to project design and additional measures that may be required to address the extent and intensity of impacts across various groups. The detailed mitigation plan includes specific measures to mitigate the impacts.
SIMP- Institutional framework

- Description of institutional structures and key person responsible for each mitigation measures
  - RFCTLARR ജിൻസൂജി മലയാളം, രാജ്യത്തിന്റെ സമാനമായി, സാമൂഹ്യ സ്ഥാപനങ്ങൾ

- Specify role of NGO’s etc, if involved

- Indicate capacities required and capacity building plan, including technical assistance, if any

- Timelines for each activity
Social impact management plan Budget and financing of mitigation plan

- Cost of all resettlement and rehabilitation costs

The cost of all resettlement and rehabilitation costs at the rate of ₹50 lakh for the affected population.

- Annual budget and plan of action

The annual budget and plan of action is ₹2447 crore (₹1100 crore for the affected population). The budget is effective from 01.01.2021 under GO(Rt)No.3/2021/PWD (Velle). The budget is released as ₹6.5 crore for the affected population.

- Funding sources with breakup

- Reporting mechanisms and monitoring roles

SIMP- Monitoring and evaluation

- Key monitoring and evaluative indicators

The key monitoring and evaluative indicators are 2013 under RFCTLARR Act and 2015 under RFCTLARR Act (Kerala) Rules.
Plan for independent evaluation

Analysis of costs and benefits and recommendation on acquisition

Final conclusions on:

Assessment of public purpose

Less displacing alternatives
Minimum requirement of land

The minimum requirement of land is 0.00577 hectares. The area to be acquired is estimated to be 0.00577 hectares. The nature of such land use is not specified.

Nature and intensity of social impacts

The nature and intensity of social impacts are as follows:
- The intensity of social impacts is moderate, with some adverse effects on the local population and environment.
- The area to be acquired is estimated to be 0.00577 hectares.
- The nature of such land use is not specified.

Viable mitigation measures extent to which mitigation measures will address costs

The viable mitigation measures are as follows:
- The extent to which mitigation measures will address costs is not specified.
- The area to be acquired is estimated to be 0.00577 hectares.
- The nature of such land use is not specified.

Final recommendation on whether the acquisition should go through or not

The final recommendation is as follows:
- The acquisition should proceed with the necessary mitigation measures.
- The area to be acquired is estimated to be 0.00577 hectares.
- The nature of such land use is not specified.
